

E-Safety support for parents

We have been informed that The Lucy Faithful Foundation has produced a new guide aimed at supporting parents whose children have already placed themselves in risky situations online – helping them to understand what has happened, why and how they can talk to their children and access further support.

The 32-page guide, 'What's the problem?' looks at three key issues:

- My child exhibits risk taking behaviour by accessing adult pornography.
- My child has behaved irresponsibly by sending or receiving sexual images.
- My child has been arrested for viewing indecent images of children.
