

Beyond the AI Frontier: Crafting a Responsible and Revolutionary Future

**A lecture by Mani Janakiraman from the
London Stock Exchange Group**

Wednesday, 17th January

6.00pm-7.00pm

(Tea and coffee served from 5:45pm)

Lillingstone Trust Community Laboratory

Discovery Centre, Royal Latin School, Buckingham

AI has the potential to drastically transform our world for the better – from fighting plastic pollution, to discovering new medical drugs to prevent and treat disease. In the midst of these advancements, new challenges and risks are also arising. We'll discuss ways and means of crafting a responsible and revolutionary future.

About the speaker

A passionate product leader with a global outlook architecting innovative solutions on data, privacy, governance, risk, regulation, compliance (GRC) and cyber security projects in the financial services, public utilities and non-profit sectors. Currently working as Global Product Manager with London Stock Exchange Group (LSEG), Mani Janakiraman is also a regular keynote speaker in conferences around the world where he is invited to speak on topics around digital, cyber and AI.
